PROFILE

Data Analyst (French RNCP level 6, bachelor's level). I build reliable dashboards, from the SQL query to the presentation, checking every metric at the source before presenting it.

SKILLS

- **Data:** SQL (BigQuery, SQL Server, MySQL) · dbt · Python (Pandas, NumPy) · Jupyter
- **Visualisation:** Looker Studio · Power BI (DAX) · Tableau · Matplotlib · Seaborn
- **Machine learning:** Scikit-learn · K-Means · PCA · logistic regression
- **Tools:** Google Cloud · GitHub Actions · Docker · Git / GitHub · Knime · Excel

SOFT SKILLS

- Rigour: verify before concluding
- Self-reliant when working remotely
- Explaining data to non-technical audiences

LANGUAGES

- **French:** native
- **English:** good comprehension, intermediate speaking and writing

INTERESTS

Piano · Cycling · Travel · Table tennis

Data Analyst

Available now · 6 to 8 month fixed-term contract · Marseille or remote

PROFESSIONAL EXPERIENCE

Data Analyst intern · Axiome **Sep - Oct 2026**
Publisher of Lumina, an AI assistant for industry · remote · 3 weeks

- Designed 3 **Looker Studio** dashboards connected to **BigQuery**: usage volume, rate of answers without context, SaaS vs on-premise comparison, answer quality.
- Analysed the data schema (2 tables, 3 views) and built the metrics requested by the team.
- Checked every metric in **SQL**: found a misdefined column (a monthly counter treated as daily) and aggregation errors, fixed before the presentation.
- Presented the results to the team, then made fixes to the company website through GitHub (reviewed pull requests, continuous integration).

Application developer intern · Urgences et Solidarités **Jan - Feb 2023**
BTS SIO, second year · Aubagne

- Maintained and fixed a business application written in C#, then rewrote it in PHP / JavaScript.
- **SQL** queries on the application database (personal data) and security hardening of the application.
- Worked with users to understand their needs and propose suitable solutions.

Web developer intern · Kalune Digitals Services **May - Jun 2022**
BTS SIO, first year · Marseille · remote

- Built a dynamic website and designed its **MySQL** database, connected to the site.
- Worked independently and remotely.

EDUCATION

Data Analyst, RNCP level 6 (bachelor's level) · OpenClassrooms **2025 - 2026**
Qualification awarded · November 2026

BTS SIO, two-year degree in IT services **2021 - 2023**
Software development option (SLAM) · Lycée Marie Curie · passed with merit

PROJECTS

13 projects documented on remydaura.github.io/en

- **Automated data pipeline (personal project)**: fuel prices from nearly 9,800 stations loaded into BigQuery every day, dbt models and 15 tests, GitHub Actions orchestration, Docker, public dashboard.
- **Making a data pipeline reliable with AI**: compared Pandera, Great Expectations and generative AI; 8 of 9 anomaly categories detected automatically, 2 reproducibility bugs fixed.
- **Counterfeit banknote detection**: classification model (logistic regression selected), reusable pipeline and production script.
- **Export market study**: FAO and World Bank data, PCA and clustering (K-Means, hierarchical clustering) to identify target countries, presented to an executive committee.
- **Power BI dashboard, access to drinking water**: 3 lines of analysis for an NGO (access, mortality, political stability), advanced DAX modelling, defended before a jury.
